

THE SUGAR-USING INDUSTRY EMPLOYS OVER 600,000 AMERICAN WORKERS

Yet, U.S. sugar policy is killing these jobs and hurting small businesses and consumers alike. In fact, the Department of Commerce estimates that the sugar subsidy kills three manufacturing jobs for every sugar-growing job it supposedly saves. And these government handouts to Big Sugar don't come cheap. They cost this country more than \$4 billion annually. It's time to end this government scheme and tell Big Sugar the sweet deal is over.

Say NO to Sugar Subsidies!
Say YES to America's Small Businesses and Workers!
