CONNECTING SOUND SCIENCE WITH SOUND POLICY

The **GMA Science Forum** has consistently educated scientists and decision makers within the food, beverage and consumer products industry for nearly a decade. During this unique event, we'll examine the most newsworthy regulatory and legislative issues affecting manufacturers across the globe. In 2019, the GMA Science Forum will provide attendees with multiple views and actions to be taken in order to ensure policies, laws and regulations are based on sound, up-to-date science, and achieve compliance with the ever-changing regulatory environment.

This event brings together a roster of acclaimed individuals to keep the science community abreast and ahead of emerging science, innovation, safety and legal requirements in a wide array of areas. We'll explore themes including food safety, government regulations, global issues, chemical ingredients, nutrition and labeling, biotechnology and more.

Nowhere else does the breadth and depth of science and regulatory affairs professionals from across the CPG industry gather to hear the latest developments in product safety, health and wellness, global trade and emerging science and technologies.

2019 GMA Science Forum conference partners will have the opportunity to connect with senior executives with responsibility for product safety, R&D, quality assurance, regulatory affairs, health & nutrition, global affairs, and policy from the leading food, beverage, and consumer product manufacturers.
